## Logbook [32|64bit] [Latest] 2022

Logbook Torrent Download is a multipurpose software used for tracking and recording your aircraft's flights and time. It includes several analytical tools, graphs and features to make aircraft management and help tracking. Multiple choice of a date and time in the future Logbook can optionally choose a date and time in the future. The application automatically tracks the time and date of a flight and saves these data in a log file for the current day. Aircraft tracking With Logbook, you can track your aircraft's flights and time, using a database of previous data from different sites. Thus, you can have access to multiple data sources, all the while having one place to enter the information. Track a vehicle With this tool, you can track any vehicle, be it an automobile or a plane. In the case of a vehicle, you can also enter the details and dimensions of the vehicle. All recorded data will be stored in a log file for future use. Data and time analysis When you come across a new piece of information that you need to analyze, you can simply click on it. The information will be presented on a chart that contains information such as flight time, distance, speed, altitude, fuel and many others. Capture image When you land an aircraft, you can import the information captured through the camera, using the "Find and Capture" function, into the application. All captured data will be stored and the chart will be updated accordingly. You can choose from any of the information recorded while you are using Logbook. Consequently, you can view all data in a multi-chart. You can set the software to be used as an online calendar. When you log a new flight, you can manually enter the details and date into the "Quick Access" window on the left side of the application, in case you're not interested in recording a new time and date for your flight. At the bottom of the window, a dialog box enables you to select your preferred data source, which includes the option to enter a new time and date in the future. Search for a specific data using an alternative method than the calendar window. If you are unsure of the exact data for a flight, you can scroll through the table, navigate to the specific line and enter the details manually. You can type in any line of data to be shown on the screen and it will instantly update the chart with the results. After typing in the address and date of a
