Keyboard Macro Recorder is a Windows program designed to help the user record keyboard commands, text and mouse movements without the need to use the mouse. Keyboard Macro Recorder can record a single or multiple keys presses, the actual length of a mouse click, text, URLs, email addresses, or other operations. Simply select a keyboard shortcut in the program and it is then recorded in a convenient text file. The text file can be edited, saved and archived for future reference. Keyboard Macro Recorder can record not only the sequence of the keyboard commands but also the arguments that are being entered after the command. You can also set the parameters like: before recording, the desired length of the recorded file, whether the command has already been recorded, whether to allow recording of deleted commands and so on. Once the recording is done, the text file can be saved to the hard drive and archived as you like. Keyboard Macro Recorder can record events from a group of commands or from a single command. As far as the commands are concerned, you can record mouse clicks, text operations and a number of keyboard commands. The program will automatically analyze the cursor position and store the cursor position as well as text that is being typed. You can also record the text that is being edited, url, email addresses and so on. You can easily edit the recorded text. You can save the recorded commands or the edited text to a text file. The file can be saved and archived with the built-in archiving function of the program. When you start recording a new command, you can also specify the number of milliseconds required to record the command. The program can also record keyboard shortcuts. The program can record any number of commands and can save the commands to the text file with different names. You can save the text from the edited file to the hard drive or archive it. Keyboard Macro Recorder can record the applications that have been launched when you click the hotkey. With the built-in keyboard shortcuts, you can launch the application quickly without using the mouse or the keyboard. Keyboard Macro Recorder can record the applications that you launch from the Windows start menu or from the desktop. The application can record any number of shortcuts. Once the recording is done, the program can save the recording to the text file. You can also record your selected text and the cursor position as well. The saved recording can be archived. You can also archive any recorded file. Keyboard Macro Recorder can record text in plain or rich text

Change your contacts and address files to CSV format. Eliminate duplicates, false addresses or wrong file formats. Provides a friendly user interface and gives you complete control of the conversion process. Handle multiple files at the same time and keep your contacts intact.

If you are on the lookout for a reliable software utility that can change the file format of your vCard documents to CSV, you may want to try out Softaken VCF to CSV Converter, since it is a product that claims to be just that. Convert vCard files to CSV As made clear by its very name, the application can convert your VCF files to CSV, all without asking you to get involved in the process. On the contrary, the necessary user input is minimal, and all you are required to do is indicate the vCard documents you want to process. Considering that the program's focus is quite limited, it is to be expected for its user interface to follow in its footsteps and be based on a similar simplistic model. And that is the case since the tool prompts you with an intuitive GUI that packs only a few controls. User input is limited to just a few clicks

You can prepare the files you want to be converted to CSV by hitting the "Add" button at the top of the main window or by resorting to the "File" menu. At this point, on the left panel, you can see a list of all the VCF documents while on the right a preview of each selected file is displayed so that you easily know its contents. Once you have decided on the data you want to turn to CSV, clicking the "Export" button should bring you to the final step, when you also need to specify the output location for your newly converted file. Approachable converter that allows you to be in full control of the processed data

All in all, Softaken CVF to CSV Converter is a responsive piece of software that can extract relevant data from your vCard files in an instant. It requires no considerable computer skills in order to fully exploit it and it lets you preview the documents you want to convert, which makes it an easy-to-manage tool.
