ActiTIME Extended X64

actiTIME Extended is a time-tracking software for small to mid size companies that helps you manage your projects and analyze the time spent. It includes a report for billing purposes and integrates with QuickBooks. Other reports allow you to group your data by many parameters including users, customers, projects, tasks, billing types, dates etc. You can keep track of your time-off, holidays, sick leaves and generate Overtime / Undertime report basing on this information. You can prevent users from changing your data by locking your changes. actiTIME Extended supports UTF-8 character set so you can make entries in other languages besides English. 2.0.0 2018-12-13 Hello! We are proud to announce that actiTIME now supports UTF-8 character set which means you can write messages in other languages besides English. Thank you for your support. Bugfix We corrected the bug that caused the Report to be incorrect on a dataset which was in a range greater than zero. We fixed the bugs that caused the following errors: - The task could be created without the task type on the task line. - The task was written multiple times. - The task was not created on a certain date. - The task total was not calculated correctly. Hello! We are proud to announce that actiTIME now supports UTF-8 character set which means you can write messages in other languages besides English. Thank you for your support. Bugfix We corrected the bug that caused the Report to be incorrect on a dataset which was in a range greater than zero. We fixed the bugs that caused the following errors: - The task could be created without the task type on the task line. - The task was written multiple times. - The task was not created on a certain date. - The task total was not calculated correctly. Added We added new functions which allow you to make a report based on your data. You can group your data by many parameters including users, customers, projects, tasks, billing types, dates etc. You can keep track of your time-off, holidays, sick leaves and generate Overtime / Undertime report basing on this information. Added We added new functions which allow you to make a report based on your data. System Requirements For ActiTIME Extended:

OS: WinXP, WinVista, Win7 CPU: 2.3GHz or faster processor, 2.5 GHz for Windows 7 Memory: 2 GB RAM Graphics: DirectX 9 compatible DirectX: Version 9 Hard Disk: 7.5 GB space A point of view on it, is that we have no major problems on the evaluation of the entry. The thing we were not so pleased with, is the full attention that has been given to the texture. It is possible to play
