Disktest PRO is a handy tool for check and repair your floppy disk. Its intuitive interface offers an easy to understand interface with a large variety of tools for disk maintenance. Main features: Copy and verify disk content to a floppy disk Backup disk content to a floppy disk Format disk Repair damaged floppy disks Scan floppy disk Detailed screen view Requirements: Windows 98/ME/NT/2000/XP (SP1 or later) Free download of Disktest PRO 8.0.2.102, size 3.98 Mb. Link Flash Drive Toolkit (PDF) Link Flash Drive Toolkit is a collection of free software utilities for the creation, management and transfer of files to and from USB flash drives (or eXtreme Capacity USB drives - eXtreme Capacity USB drives are 2GB in size). The collection is created with the convenience of the users in mind, so the PDF Reader v4.0, PDF Chameleon v2.0 and PDF Driver for Drivers v2.3 are included. As the developer stated, the Link Flash Drive Toolkit has proven to be very effective and fast when reading and writing files from the flash drives. It can be used directly with other programs as well. Thing is: in the Link Flash Drive Toolkit can be managed and used as a portable PDF reader, PDF Chameleon, PDF driver, USB Flash drive. From PDF Reader 4.0 to PDF Driver for Drivers v2.3, you can now read and create files from your USB flash drives! You can also use the "Flash Drive Toolkit" (including the free PDF Reader v4.0 and PDF Chameleon v2.0) to read and create files from the eXtreme Capacity USB drive. Try it out! Create PDF files (from any local or network-shared source), drag and drop them from the Flash Drive Toolkit or the Network to the PDF Reader, load and print them, and do whatever you want. The driver works by accessing the hard drive or USB flash drive, so if you use the Flash Drive Toolkit to create or open PDF files from any drive, and then use another program to edit those files, your changes will be saved. In addition, you can format or partition the drive by opening the drive in the Flash Drive Toolkit. A part of the Flash Drive Toolkit is the Backup Tool, which helps you create and save to the USB Flash Drive. The Backup Tool can also be used to back up any part of your computer's hard drive (such as the C: or D: drive). You can then use the Backup Tool to save your files to the USB flash drive, thereby saving the entire drive. The most recent version of the Flash Drive Toolkit
