SMIR Crack + License Keygen Free

SMIR is a very simple and easy-to-use application that allows you to calculate mortality and incidence ratios. This application is lightweight, portable and does not modify the registry entries on your PC. Required.NET Framework to run: The application is written in C# and requires the.NET Framework, so it can be run on Windows XP or later versions. You can view SMIR in two different ways SMIR allows you to operate through a user-friendly interface, which is available as a standalone desktop application or as a Windows service. The tool allows for the calculations of both mortality and incidence ratios, depending on the settings you decide to configure. Additionally, you can use it as a service for easy viewing of the results. You can also use it to view the results of other application's tasks This application also allows you to examine the output of other programs that perform ratio calculations, as it can automatically connect to other applications in order to view their results. You can add several different applications to this, and you can even view the results for multiple tasks at once, as shown in the screenshot below. You can also export your data and share them with other people. Help is provided via a Help button You can get help with this application through a simple Help button located on the top left corner. SMIR's Features: Its intuitive interface is perfect for use in all circumstances SMIR is designed for easy use. Its minimalistic user interface is fully intuitive. Moreover, you can use it as a standalone application or run it as a Windows service. Both its desktop and Windows service interfaces are fully capable of calculating mortality and incidence ratios, given the information you input. The program does not create additional files or folders It does not tamper with the registry of your computer, as it does not create any extra files or folders. SMIR is lightweight This application has a very lightweight footprint, thus making it a lightweight application. The program does not interfere with your system The program does not tamper with your Windows' registry. It does not create extra files or folders, nor does it make any changes to your system. SMIR is portable SMIR is portable, as it does not require you to install it on your PC. Additionally, the application does not alter any registry entries. It is also capable of viewing the results of

SMIR Crack License Keygen Download [April-2022]

SMIR (Standardized Mortality or Incidence Ratio) can calculate different ratios and indicators. It is an application that assists health departments in the collection, evaluation and analysis of mortality or incidence rates. The application can be used to calculate mortality, incidence, mortality or incidence ratio, as well as the prevalence (over a given population), the incidence ratio (mortality or incidence rates) among a general population, the standardized mortality or incidence ratio and the standardized morbidity or incidence ratio. Keyfeatures: * Calculation of standardized incidence or mortality ratio * Calculation of standardized morbidity or incidence ratio * Calculation of standardized incidence or mortality ratio * Calculation of standardized morbidity or incidence ratio * Calculation of standardized mortality or incidence ratio * Calculation of incidence ratio * Calculation of prevalence * Calculation of incidence ratio * Calculation of mortality ratio *

Calculation of mortality rate * Calculation of standardized morbidity or incidence ratio *
Calculation of standardized morbidity or incidence ratio * Calculation of standardized mortality or
incidence ratio * Calculation of standardized mortality or incidence ratio * Calculation of incidence
ratio * Calculation of incidence rate * Calculation of standardized morbidity or incidence ratio *
Calculation of standardized morbidity or incidence ratio * Calculation of standardized mortality or
incidence ratio * Calculation of standardized mortality or incidence ratio * Calculation of
standardized morbidity or incidence ratio * Calculation of incidence ratio * Calculation of mortality
rate * Calculation of mortality rate * Calculation of standardized mortality or incidence ratio *
Calculation of standardized morbidity or incidence ratio * Calculation of standardized incidence or
mortality ratio * Calculation of standardized mortality or incidence ratio * Calculation of incidence
ratio * Calculation of standardized morbidity or incidence ratio * Calculation of standardized
incidence or mortality ratio * Calculation of standardized morbidity or incidence ratio * Calculation
of standardized morbidity or incidence ratio * Calculation of standardized mortality or incidence
ratio * Calculation of standardized morbidity or incidence ratio * Calculation of standardized
morbidity or incidence ratio * Calculation of standardized mortality or incidence ratio * Calculation
of incidence ratio * Calculation of standardized mortality or incidence ratio * Calculation of
standardized mortality or incidence ratio * Calculation of standardized mortality or incidence ratio *
Calculation of standardized mortality or incidence ratio * Calculation of standardized mortality or
incidence ratio * Calculation 1d6a3396d6

SMIR Download [Latest 2022]

What's New in the SMIR?

SMIR is an application that helps calculate the standardized mortality or incidence ratio. Its interface is intuitive, allowing you to navigate it with ease. With the help of this program, you can perform ratio calculations regarding mortality or incidence in a convenient manner. It also supports the standardized mortality or incidence ratio, so you can specify the subject population under study, the number of observed cases and the number of subjects in the population. In addition, you can either input the incidence or prevalence and population values. By doing this, you will be able to calculate the standardized mortality or incidence ratio of your subjects. With SMIR, you can calculate the standardized mortality or incidence ratio in a convenient fashion. Its interface is intuitive, allowing you to navigate it with ease. SMIR Key Features: - You can specify any data, by offering the number of cases and the number of subjects in the population. You can also input the prevalence or incidence and population values. - After choosing the required information, you can proceed to input the necessary data or choose an option. Once you have selected the option, you will be asked to provide the values for each variable. - Once you have inputted the necessary data, this application will calculate the standardized mortality or incidence ratio. - You will be provided with an intuitive interface to verify the result. - You can easily share your data and the results, in a convenient manner. - You can easily share your data with your colleagues, friends and family. - This application is 100% FREE. SMIR (Standardized Mortality or Incidence Ratio) SMIR Description: SMIR is an application that helps calculate the standardized mortality or incidence ratio. Its interface is intuitive, allowing you to navigate it with ease. With the help of this program, you can perform ratio calculations regarding mortality or incidence in a convenient manner. It also supports the standardized mortality or incidence ratio, so you can specify the subject population under study, the number of observed cases and the number of subjects in the population. In addition, you can either input the incidence or prevalence and population values. By doing this, you will be able to calculate the standardized mortality or incidence ratio of your subjects. With SMIR, you can calculate the standardized mortality or incidence ratio in a convenient fashion. Its interface is intuitive, allowing you to navigate it with ease. SMIR Key Features: - You can specify any data, by offering the number of cases and the number of subjects in the population. You can also input the prevalence or incidence and population values. - After choosing the required information, you can proceed to input the necessary data or choose an option.
