**AutoCAD**

The first version of AutoCAD could trace vector shapes and fill interior and exterior

---

surfaces. In 1987, Autodesk released AutoCAD LT, which was significantly lighter and simpler to use than the original version, and capable of 2-D drawing. In 1996, Autodesk introduced AutoCAD 2000, which could read DWG, DXF and other 2-D and 3-D formats, and introduced the DWG2 format. AutoCAD 2001 was released in 1998, and included 2-D

---

drafting, part-based drafting, 2-D annotation and integration with other Autodesk products. AutoCAD 2002 was released in 2000, and featured the ribbon, parametric support, and a ribbon toolbar. AutoCAD 2003 was released in 2001, and added 2-D engineering and 3-D support. In 2002, AutoCAD LT was introduced as a smaller, faster, cheaper

---

alternative to AutoCAD. AutoCAD 2004 added 2-D and 3-D editing and 2-D annotation and was the first to use the Windows Vista GUI. AutoCAD 2010 was released in 2009, and introduced the DWG3 format. AutoCAD is similar to other applications in that it can be used to create two-dimensional drawings. The difference with other CAD

---

programs is that AutoCAD can automatically create 3-D drawings. The 3-D drawing capability is integrated into the architecture of the program and can be accessed using a user interface similar to other CAD software, or using commands. AutoCAD can be used to model buildings, bridges, tunnels, ships, and even aircraft. It can be used

---

to create a variety of three-dimensional objects including mechanical, architectural, manufactured, virtual, and artistic. In the late 1970s, Autodesk, Inc., founded by former MIT professor John P. R. Ellis, began to develop CAD software for CAD/CAM applications, specifically for mechanical designs. In 1982, the company released AutoCAD, initially for the DOS

---

platform. Autodesk also developed a small version called AutoCAD LT, which competed with the market-leading version, DGN.

Autodesk acquired the fledgling company in 1986. The PC version of AutoCAD shipped in 1987 and is the first CAD application to use vector-based graphics, allowing users to create accurate, precise drawings.

The first version of AutoCAD, called AutoCAD for the Apple Macintosh, appeared in 1988.

Remove trailing spaces and  
commas I have some list of  
strings which contains strings  
with spaces and commas (" , ")  
on both sides of the string. I

---

need to remove the trailing spaces and the commas at the end of each string.

Example: `d1 =`

```
['/home/user1',  
'/home/user2', '/home/user3']
```

To remove trailing spaces I use this code: `d1 = [x.strip() for x in d1]` Which results in:

```
['/home/user1',  
'/home/user2', '/home/user3']
```

My next step was to use this code: `d1 = [x.strip(',')] for x in`

---

d1] Which results in:  
['/home/user1',  
 '/home/user2', '/home/user3']  
Is there any way I can use a  
comprehension to get this  
result? I would like the  
solution to be as concise as

The purpose of this study was to assess whether the pulmonary microvascular permeability index (PMPI) increases after the acute respiratory distress syndrome (ARDS) develops and whether the use of lung-protective ventilator strategies decreases PMPI.
