BR Blue Class 121 Add-On: Includes one player-replaceable body and two scenery items: The BR Blue body features matching livery as the original rolling stock found on many services around the UK, including the SouthWest, SouthEast, East Coast and Wales. The carriage interior features a modern design with a single red table with seat, and plenty of other exposed brass and dark blue. The cab follows the two-tone blue and cream interior layout as found in the original model, but with the high-back seats that are common on the model also included. The fully equipped, reliable and easily maintained twenty-two-year old carriage interior features a light blue overhead with wood-cased air-conditioning fans. The electronic intercom system uses a typical 1960s design with a single hi-tension facing the driver, single low-tension facing the guard, and a curtsey facing the carriage-side corridor. The full 360° roof camera, created from the original model's excellent 360° views, has just three buttons for running, parking and stopping, just like the original. The facility also includes a journey time display. The BR Blue carriage interior features 2:3 scale reproduction of the 1960s design with wood-cased air-conditioning fans. The authentic graphics and computer-generated photographs show the model in perfect detail with a photographic quality of 1:160 and fully textured interior surfaces. \* OVER 250 3D MODELS + 3D SCENERY \* Over 250 3D Models: Your classic 1960s train interior is reproduced in over 250 3D models including parts, furniture, handrails, seats, platform, doors, roof, floor and more. "Citadale - The Legends Trilogy" is a nostalgic side-scroller platform game in the style of many NES/SNES games. However, this game draws inspiration from the much better, but less known and less played game "Icarus", of the genre known as 'Metroidvania'. That's really interesting, I have not played Icarus but this is something I may pick up someday, I can do without the bullsh\*t. I just hope the concept doesn't get stuck in an obscure style. Anyways good job for the share. Yeah, as I understand it, it's the lack of controls, the hard platforming, and just the overall unrealistic aspect. But, I feel a lot of people just don't like how the game plays out or the graphics. So, give it a chance if you do get it. ^\_^ Well, let's put it this way: The concept, the art, the music, and the gameplay are all extremely solid. However, it had too many parts of just sheer terrible, and the actual gameplay is just so \*\*\*\*ing hard. Like...when I made it through the level, I'd get moments of actually enjoying it, and then....sometimes...three seconds later...it would start \*\*\*\*ing me over. Then, at the end of the game, when you finally get to the music, the music is just absolutely awful. The whole game is like that. Even though I really like the concept. Even though I do feel it deserves to be made. I can kinda understand WHY it was never made. I really wish the PC version looked better, though. As I said before, I don't mind the art, I don't mind the concept, or the gameplay. However, the fact that the music is sometimes terrible (and then when it's good, it is so far away), and that it looks like ass, shouldn't even be considered while looking at the fact that this game is actually missing, is what makes this whole thing so \*\*\*\*ed up, and gives people the wrong idea about it. It looks at as though there was one \*\*\*\*ed up gameplay, and then the rest was \*\*\*\*ed up art, since it looks like a PS2 game. When there is a vote, I would usually go for 2nd, or 3rd, and I'm sure that's how most people vote, since most people on here are decent. I'm actually in agreement with c9d1549cdd

For if it had, it would have died.” ~ John 15:19 This is a verse I needed to read this morning. It’s the first verse of my prayer journal and I love it. I love the truth of it. I am the one who uttered and saved the Body of Christ so that I could be in the middle of Him. And this is what’s been rattling around in my heart this morning. Sometimes I am so selfish. I look at the HUGE woman named Jesus and think only about what I want or need. I wish that my pain was His pain, that my sorrow was His sorrow. I hate that I’m so selfish like this. I don’t like**
