Dream is a free-roaming interactive survival game about a man lost in a dream. A man who tried to awaken from this dream. A dream about which he cannot tell, despite all efforts to remember his past. Dream is an extremely complex game where the whole idea of exploration and survival is based on the main character's deeply dream-like state and awareness, controlled by a purely emotional and strange brain-mapping. By controlling the main character's emotions, you can successfully manage your mental and physical health, balance your mood swings between melancholia and euphoria, and play the game. Pitch into the jaws of death as you venture across themed levels filled with intimidating dinosaurs, you and your hunting partners will have to deal with the consequences that come with the unexpected. In Wrath of the Goliaths: Dinosaurs, you will be thrown into the literal jaws of death as you take down nature's biggest beasts! To begin hunting, you will need to start off slow and work your way up. Entering a hunt is as easy as filling out a form, and being sent off to take down the selected hunts. Note that the hunts you select may have a chance at not appearing at all, fear not, your perma-points do not go away after beginning a hunt. They can only go up after each successful hunt! What Is In Game So Far: All of these features are implemented, but they may still contain bugs, errors, or mistakes that will be fixed through updates. Several dinosaurs to hunt such as Carnotaurus and Allosaurus, with a few to unlock. Several powerful weapons to choose from with more advanced ones to be discovered. Trophy collecting. Dinosaur AI, dinosaurs will change their current behavior based on their perceived threat, hunger and thirst, however! Like our predecessors, if you run into any of the dinosaurs, you are as good as dead. Several different maps to choose from, from a section in a redwood forest, to a hot and massive desert! Observation mode, allowing you to get up close with the dinosaurs and discover their behaviors and patterns. Discover what alerts them in this mode! What Our Team Is Looking For: At the moment, we are looking for a 6 man team to be the core team. We are happy to work with anyone who shares our passion for dinosaurs, and are also excited to help someone who wants to become involved with a project in its early stages. Our first release is scheduled for March 2014! First, note that WrAoGTD is not a complete game. Your goal is to earn experience points within the game to unlock new weapons, accessories, and dinosaurs. You will be awarded points based on the kills that you make. You will also be able to find dinosaur eggs in each level (as well as several other things). When you find a dinosaur egg, you will have a few months to raise the egg so that it will hatch. During those months, if you aren't playing, the egg will hatch, but the hatchling will have no experience points and will c9d1549cdd
