Field of the Invention The present invention relates to a semiconductor device including a transistor having a non-single crystalline semiconductor substrate, and a method of manufacturing such a semiconductor device. 2. Description of the Related Art A semiconductor device (LD: laser diode) which is mounted on a monitor diode is required to have a high reverse-bias breakdown voltage because the monitor diode emits light. In a conventional LD which has a non-single crystalline substrate (e.g., a GaAs substrate), the reverse-bias breakdown voltage is enhanced by the provision of an electric field relaxation layer (e.g., an AlGaAs layer) to form a Schottky junction between the semiconductor substrate and an electrode. However, the electric field relaxation layer tends to deteriorate the carrier mobility, and thus lowers the operating speed of the transistor. The deterioration in the carrier mobility causes a reduction in the amplification factor $h_{sub.FE}$, which represents the operating efficiency. To enhance the operating efficiency, a power transistor mounted on a wafer which is formed on a single crystalline silicon substrate must have the same structure as a transistor on a wafer which is formed on a non-single crystalline substrate. However, a transistor formed on a non-single crystalline substrate has a relatively low operating speed. Therefore, a conventional power transistor

cannot be utilized as a high-speed LD. Accordingly, it is an object of the present invention to provide a semiconductor device which has a high-speed transistor, and a method of manufacturing such a semiconductor device. Do you know the top three buyers of Bitcoin, the virtual currency that is rapidly gaining in popularity? Well, according to the Bitfinex exchange, the answer lies in the 10 largest economies. In a recent monthly report, the Bitfinex team analyzed the top 10 economies for active bitcoin users. While the United States are most likely to be buying and selling bitcoin

many similar problems to you all. I used to have a NLS file but everything got
corrupted. I started a thread about it and a few people offered to help me, but i
had to break the rules and remove the thread. So all i can do now is to share my
files so you can get rid of this problem. I have a vector clipart library in a ZIP file
and i would like to give it away. I used to have a blog but i deleted it, so i don't
have any posts. If anyone knows the NAME of the font i used in these files,
please let me know. I don't remember what it was or any information about it.
But i am pretty sure that i used to have a free Download Maxon Power Designs
