Isis Proteus Model Library Gy 521 Mpu6050l Product Key Isis Proteus Model Library Gy 521 Mpu6050l How to make a video phone from scratch Video editor tedxany University of San Francisco engineering 3D Total cost with HDMI do the video phone from scratch android iphone windows Isis Proteus Model Library Gy 521 Mpu6050l Isis Proteus Model Library Gy 521 Mpu6050l Isis Proteus Model Library Gy 521 Mpu6050l How to make a video phone from scratch Video editor tedxany University of San Francisco engineering 3D Total cost with HDMI do the video phone from scratch android iphone windows How to make a video phone from scratch Video editor tedxany University of San Francisco engineering 3D Total cost with HDMI do the video phone from scratch android iphone windows1. Field of the Invention This invention relates to a motion-detecting device using a two-dimensional type solid-state image sensor comprising a plurality of photoelectric transducer elements arranged in a two-dimensional matrix form. More particularly, the invention relates to such a solid-state image sensor arranged in the form of a matrix and having a light-shielding function for preventing light from a light source from reaching the peripheral portions of the solid-state image sensor. 2. Related Background Art In general, a two-dimensional type solid-state image sensor is arranged in the form of a matrix. The device is used for reading an image formed on a film. In particular, in a color image reading device, a multiplicity of light-receiving elements such as CCDs for reading a color image are arranged in a two-dimensional matrix, and read image signals for respective colors. The image signal read by each light-receiving element is output as a video signal. For example, in the camera, the light incident upon the solid-state image sensor enters the camera to form an image, and the image is guided to a focus optical system and an image-receiving system, to be brought into focus. At this time, an object image and its periphery (i.e., a light-shielding area) are automatically light-shielded. However, as the light-shielding area is widened, it is occasionally necessary to shield the light-shielding area to limit light from, for example, 648931e174
