Now they're in the mirror. "We're trying to throw a hat into the ring and be more of a rival," YSU head coach Ryan Cartier said. The Penguins (11-8-2, 7-3-2 OHMSL) bounced back from their first loss of the season, beating Wayne State 11-8 on Thursday. The Penguins have won two straight and are back in the win column. "We haven't lost yet," Cartier said of his team. "We were prepared for the game today. To win against Wayne State was big for us. They are a fast team. "We are developing a great chemistry. We are passing the puck well now." WSU had been ranked in the top 10 in the nation for much of the season. The Flyers were beaten on the ice by the Penguins and on the scoreboard by the Penguins in their first meeting this season, a 6-2 win for WSU. Sending the Penguins home with a victory on Friday night would look good on Wayne State's resume, but YSU's success and consistency have been a

--- abstract: 'There exists a wealth of data from past and ongoing experiments such as COMPASS at CERN SPS, PANDA at FAIR, CLAS12 at Jefferson Lab and PANDA-TOF at GSI. This report covers a recent study on a novel method to infer the mass and quantum numbers of $\Omega$ baryons which form a multiplets of SU(3) that are $\Omega^-$, $\Omega^0$ and $\Omega^+$ decuplet baryons in terms of the lightest SU(3) singlet and doublet dibaryons. These states are shown to be the $S$-wave states from the same spin-parity multiplet and are predicted to have mass $2431-2453$ MeV and $1788-1918$ MeV respectively. These masses are on top of the $S$-wave $\Sigma^-\pi^+$ threshold and the $D$-wave $\Sigma^+K^-$ threshold. The exotic doubly strange $\Omega$ baryons are predicted to be of the $\Omega_c$ states. The first experimental observation of an $\Omega_c$ baryon in the future PANDA-TOF experiment will be an important observation for understanding the role of strangeness in the baryon spectrum.' author: - Zhigang Xiao - 'Wei-Hong Cheng' title: 'Doubly Strange $\Omega$ Baryons and their Mixtures with Other Heavy States' --- Metallized Metallized can refer to: Metallized paper Metallization (robotics), a process for mechanical modification of objects Metallized film, a product that uses a copper-based conductor in its film Science Metallized state, is used for the description of the physical properties of a metallic alloy.
