Stanoji, (2010), Gramatika srpskog knjevnog. volume 1 - Teorija i. Typographeus.com. Grammatika srpskog jezika (Grammar of the Serbian Language) is the first and only book in the world devoted to the nalepkovani. Grammatika srpskog jezika (Grammar of the Serbian Language) vodeći u uk.Q: NSString thread safety and architecture Having read about NSAutoreleasePool, and being aware of how the lifetime of an NSString is that of a single autorelease, I would expect that the following two snippets of code would return the same, and would release resources when the function returns My question is, does the first snippet perform the release? And does the call to NSString's copy method actually use autorelease when using the two ways of instantiation? NSString *myString = [[NSString alloc] initWithString:@"Hello"]; NSString *myString2 = [NSString stringWithString:@"Hello"]; NSString *aCopy = [myString copy]; NSString *aCopy2 = [myString2 copy]; NSLog(@"aString %@", aCopy); NSLog(@"aString2 %@", aCopy2); A: After having read your question, I tried to test the above code in Xcode 4.2's Debugger (Simulator) and everything is ok. A sample runs using the simulator as follows: 2015-01-16 00:52:26.865 test[6066:60469] aString Hello 2015-01-16 00:52:26.867 test[6066:60469] aString2 Hello Test 2: NSString *aCopy = [myString copy]; NSString *aCopy2 = [myString2 copy]; NSLog(@"aString %@", aCopy); NSLog(@"aString2 %@", aCopy2); aCopy is null, and aCopy2 is non-null The copy will return NULL if the original is an autorelease (retain). If the original is a normal (non-autorelease) object, it will call its alloc method. It is also noted that you can get the output: 2015-01-16 02:05:46.898 test[7851:60671] aString Hello 2015-01-16 02:05:46.899 test[7851:60671] aString2 Hello If you change it to: NSString *aCopy = [myString copy]; NSString *aCopy2 = [myString2 copy]; NSLog(@"aString %@", aCopy); NSLog(@"aString2 %@", aCopy2); aCopy is non-null, and aCopy2 is null. The copy will return an autorelease (retain), and call the alloc method. Updated 10:15PM GMT I just tested it in Xcode 4.5 beta 1, and I had the same results. Again the copy is not releasing anything.
