Hello call of mini zombies fan of android user if you looking for call of mini zombies hack apk 1.18.[Haskell-cafe] [ANN] GHC 6.11 I am pleased to announce the release of GHC 6.11.0. GHC 6.10.1 was initially released as a security and stability update to resolve a security bug affecting GHC 6.10. The bugs fixed in 6.11.0 include: - A crash when considering a recursive binding which is known to be safe (and static) (This bug was fixed on the toplevel bug list starting from 7096, and was also fixed in 6.10.1). - Issues with IO in RTS with closures (This was actually a technical report). - A crash under some cases where it gets mishandled some operations involving LAMBDA (This is fixed in 6.10.1, but only on the toplevel, not for the upcoming 6.12.1). - Improvement of Unicode performance when compiling to a library (this was part of the goal of 6.10.1, but did not make it there). - A refinement of the control stack error location. - Various bugfixes. On the performance side, we are getting beyond the initial 6.10.1 performance improvement, and GHC 6.11 is actually in line with 6.10.1, as 6.10.1 was only a very small step forward. Performance is now as good or slightly better than e.g. the recent GHC 6.8.3. To get the release, see 04aeff104c
