Free Soundcloud Player Free

Free Soundcloud Player is a comprehensive and effective software solution that provides you with a simple means of listening to your favorite Soundcloud music effortlessly. Since there are no restrictions to the total number of tracks that can be added within the application, you can insert as many songs as you want in the dedicated list. Being known as an online audio distribution platform, SoundCloud comes in handy for users who need to upload, promote and even share their originally-created music or mixes. The application sports an intuitive and extremely easy to use interface. Each time the Copy action is triggered, it will automatically recognize the corresponding URL address and it will add it in the proper label with ease. All you have to do is to press the 'Add Url' button, located right next to the label and add your favorite song to the list. What's quite interesting is that Free Soundcloud Player enables you to insert multiple URL links. The 'Add Bulk Urls' button displays a new window from where you can easily add one address per line. After that, the application will load the songs and display them in the main window. Additionally, you can increase or decrease the volume according to your whims, shuffle the songs and move backward or forward. The bottom pane of the program enables you to save the current playlist to your computer, then open it each time you want. Also, you can easily remove the selected audio track, however, you can't delete multiple items. In case you accidentally close the program and reopen it, you will notice that Free Soundcloud Player does not display again the selected tracks so you need to save the current playlist if you want to get back the selected songs. To conclude, Free Soundcloud Player proves to be an efficient way of listening to various SoundCloud songs without the Internet or saving them into your account. Video-Ready Web Player for Flash v2.2.4 - Video-Ready Web Player for Flash is a complete solution for creating Flash-based web videos, movies, galleries, slide shows, and more. The tool can be used to create animations and loops, add text and shapes, add skins, and perform various actions in videos like, Play, Pause, Stop, Rewind, Fast Forward, Reverse, Slideshow, Random, and many more. Video-Ready Web Player for Flash v2.2.4 Requirements: 4.2+ Overview: Video-Ready Web Player
